Letter of recommendation

Atcom Internet and Multimedia S.A, is the leading web agency in Greece, with an extensive project portfolio and experience on the creation of portals, e-Shops and web & mobile applications.

We were looking for professional IT partner to support some of the projects and JCommerce seemed fit perfectly to our needs. Our cooperation has started in 2015 and since that time we have been working together on two big projects.

Key technologies used in the projects: ASP.NET 4.6.1, ASP.NET MVC 5, Asp.Net WebApi 2.2, Entity Framework, SignalR, jQuery, kendo UI, Hangfire, StructureMap, MS SQL, Odata, OAuth, C#, Sitecore MVC, Glass Mapper Sc, JavaScript, Bootstrap, Web Services

We are satisfied from collaboration. JCommerce proofed high quality of their experts and wide knowledge from different IT technologies. JCommerce specialists are open and always ready to share helpful hints on the project. Effects of their work are above reproach.

We recommend JCommerce as professional IT service provider.

Miltos Kritakis

Executive Director
